Jackie,

I general, asking the FOIA office is the best approach for these sort of questions. Asking them will provide some consistency. OGC try to help in a pinch. But often we'll be asking additional questions before being able to give you an answer, e.g. was a CBI claim made for any of the information when it was submitted, etc.

Thanks,
Erin

Subject: RE: Posting of letters for container amendments re: PFAS

Hi all,

In Friday, I asked the FOIA office and PTSLO to weigh in on releasing the letters. Am hoping to have a response before the 1pm meeting this afternoon.

Thanks,
Jackie

Subject: RE: Posting of letters for container amendments re: PFAS

Hi Catherine,

I don't think any information included in the letters is CBI, but I would like to double check with someone before answering definitively. If not, there should be no issue getting the letters uploaded into PPLS or sending any specific letter over to inquiring parties including Maryland.

I'll circle back regarding CBI.

Thanks,
Jackie

Subject: Posting of letters for container amendments re: PFAS

Hi Jenn and Jackie:

During our last PFAS coordination meeting, there was a suggestion to make all of the relevant acceptance letters for container substitutions publicly available, e.g., by posting on PPLS. We have three asks:

- 1) Can you confirm (working with others as needed) that the letters are free of FIFRA CBI?
- 2) Can they be put in the queue for PPLS uploading, simply noting that there is no revised label associated with the action/letter?
- 3) For the Monday meeting with Maryland, can we provide the acceptance letter(s) for Anvil 10+10 to them directly, once confirmed that there is no CBI?

What else should be considered? Thanks in advance for your help.

Best,
Catherine

Subject: RE: Biomist Adulticide

Hi all,

The approval letter is attached. Typically only labels get posted to PPLS, so this one wont be on there.

Thanks,
Jackie

Might be helpful for OPP to work with OPS and Region 3 to get a call scheduled. Ideally, the call would be with both Maryland Department of Ag and Maryland Department of the Environment.

Is this the type of approval that would be posted to PPLS at some point?

Yes, we approved the new container type for the Biomist 30+30 ULV (reg. no 8329-42) which is the specific product Clarke said is in question. I am copying Jackie in case you need more information.

Also, let us know If you would like RD to participate in a call with MD.

Thanks,
Marietta

Thanks for sharing this information. Am I reading the email correctly to say that we've reviewed the referenced data in the context of the Biomist products? If the answer is yes, then this could inform how we respond to subsequent inquiries. Am also wondering if we should have a follow-up conversation with Maryland.

Hi Marietta,

Thank you for your call and note. As I explained by phone, we are not aware of any testing that shows PFAS contamination in Biomist adulticides. We have not done any product testing with Biomist, though have confirmed by testing that our new Baritainer® containers and our un-fluorinated HDPE containers do not have the potential to leach PFAS into the product. We've submitted those test reports to RD and recently received approval for the Biomist adulticides.

We have not distributed any product in the fluorinated containers since the start of the year. In late January, Clarke initiated a voluntary Product Exchange Program for all of its products, and have collected product in fluorinated containers from our customers. We are currently refilling these orders with fresh production in steel, non-fluorinated HDPE, and in the new Baritainer® barrier-resin containers.

Best regards,
Karen

Hi Karen,

Following up on the voice message I left you, we have received an inquiry from PEER and from the Maryland Department of Agriculture regarding potential contamination of the Biomist Adulticide product. Is Clarke aware of any testing that shows PFAS contamination of the product? Is Clarke conducting any testing to ensure that the product does not contain PFAS contamination? Thank you.

Regards,
Marietta
